SelfCookingCenter®

Step 1 Remove all cooking trays & grids from oven
Ensure all left over food is removed from cooking chamber & drain sieve is clear.

Step 2 Close door & return to main screen.

Step 3 Press Care Control button - bottom right hand side

Step 4 Select 'medium' 'save' or 'light' for normal clean cycle.
Medium for extra strong clean cycle for heavier soiled ovens.

Step 5 If oven indicates cooking cabinet is too hot, press cool down **down blue arrow** and open the oven door.

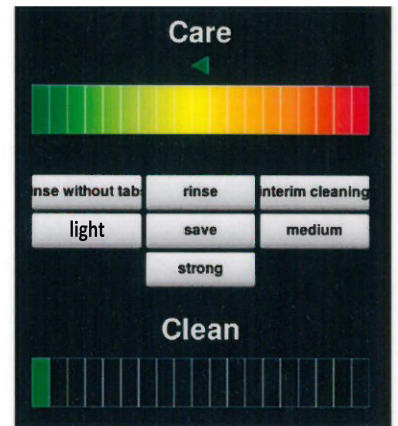

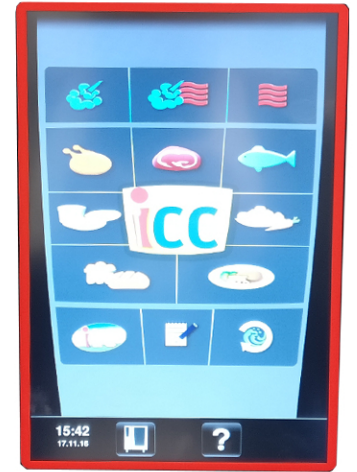

Step 6 *Always wear recommended protective gloves when handling oven tablets.* When prompted, take number of **red foil** wrapped cleaning tablets indicated on screen. Remove from foil. Place into air-baffle drum, which is inside the oven on the left hand side of oven cavity wall.

Step 7 Take quantity indicated of **blue foil** wrapped rinse tablets. Remove from foil & place all contents into drawer located

Step 8 Close door and cleaning cycle starts automatically. When cleaning cycle finishes, oven switches off automatically.
